Summary of Quarterly Results

Fourth Fiscal Quarter 2017 Highlights

- Net increase in net assets resulting from operations (i.e. net income) for the quarter ended September 30, 2017 was \$22.5 million, or \$0.38 per share, as compared to \$20.1 million, or \$0.35 per share, for the quarter ended June 30, 2017.
- Net investment income for the quarter ended September 30, 2017 was \$18.3 million, or \$0.31 per share, as compared to \$17.8 million, or \$0.31 per share, for the quarter ended June 30, 2017. Excluding a \$0.8 million accrual for the capital gain incentive fee under GAAP, net investment income for the quarter ended September 30, 2017 was \$19.1 million, or \$0.32¹ per share, as compared to \$18.4 million, or \$0.32¹ per share, excluding a \$0.6 million accrual for the capital gain incentive fee under GAAP for the quarter ended June 30, 2017.
- Net realized and unrealized gain on investments and secured borrowings of \$4.2 million, or \$0.07 per share, for the quarter ended September 30, 2017 was the result of \$11.0 million of net realized gains and \$6.8 million of net unrealized depreciation. This compares to a net realized and unrealized gain on investments and secured borrowings of \$2.3 million, or \$0.04 per share, for the prior quarter.
- Net asset value per share rose to \$16.08 at September 30, 2017 from \$16.01 at June 30, 2017 primarily due to earnings in excess of our quarterly distribution.
- New middle-market investment commitments totaled \$128.9 million for the quarter ended September 30, 2017. Approximately 14% of the new investment commitments were senior secured loans, 85% were one stop loans, and 1% were investments in equity securities. Overall, total investments in portfolio companies at fair value decreased by approximately 6.5%, or \$116.8 million, during the quarter ended September 30, 2017, due to an acceleration in repayments.
- On November 17, 2017, our Board declared a quarterly distribution of \$0.32 per share and a special distribution of \$0.08 per share, both payable on December 28, 2017 to holders of record as of December 12, 2017. The special distribution is due to taxable income exceeding distributions over the past year.

1. As a supplement to U.S. generally accepted accounting principles ("GAAP") financial measures, the Company has provided this non-GAAP financial measure. The Company believes that this non-GAAP financial measure is useful as it excludes the accrual of the capital gain incentive fee which is not contractually payable under the terms of the Company's investment advisory agreement with GC Advisors (the "Investment Advisory Agreement"). The capital gain incentive fee payable as calculated under the Investment Advisory Agreement for the period ended September 30, 2017 is \$0. However, in accordance with GAAP, the Company is required to include aggregate unrealized appreciation on investments in the calculation and accrue a capital gain incentive fee on a quarterly basis as if such unrealized capital appreciation were realized, even though such unrealized capital appreciation is not permitted to be considered in calculating the fee actually payable under the Investment Advisory Agreement. Although this non-GAAP financial measure is intended to enhance investors' understanding of the Company's business and performance, this non-GAAP financial measure should not be considered an alternative to GAAP. Refer to slide 4 for a reconciliation to the nearest GAAP measure, net investment income per share.

Interest Rate on Loans¹

1. The percentage of fixed rate loans and floating rate loans is calculated using total debt investments at fair value and excludes equity investments.

Portfolio Highlights – Spread Analysis

Portfolio Rotation – Debt Investments	Q4 2016	Q1 2017	Q2 2017	Q3 2017	Q4 2017
Weighted average interest rate of new investments ^{1,2}	7.6%	6.9%	6.4%	7.3%	7.3%
Weighted average interest rate on investments that were sold or paid-off ^{2,3}	6.8%	6.9%	6.5%	7.9%	7.3%

Weighted average fees on new investments	2.1%	1.6%	1.2%	1.6%	1.3%

1. Weighted average interest rate on new investments is based on the contractual interest rate at the time of funding. For variable rate loans that have a LIBOR or Prime rate option, the contractual rate is calculated using current LIBOR at the time of funding, the spread over LIBOR and the impact of any LIBOR floor. For variable rate loans that only have a Prime rate option, the contractual rate is calculated using current Prime at the time of funding, the spread over Prime and the impact of any Prime floor. For fixed rate loans, the contract rate is the stated fixed rate.

2. Excludes activity on the subordinated note investment in SLF.

3. Excludes exits on investments on non-accrual status.

4. Investment income yield is calculated as (a) the actual amount earned on earning investments, including the subordinated note investment in SLF, including interest and fee income and amortization of capitalized fees and discounts, divided by (b) the daily average of total earning investments at fair value. On December 30, 2016, the subordinated notes previously issued by SLF were redeemed in full and terminated.

5. Income yield is calculated as (a) the actual amount earned on earning investments, including the subordinated note investment in SLF, including interest and fee income but excluding amortization of capitalized fees and discounts, divided by (b) the daily average of total earning investments at fair value. On December 30, 2016, the subordinated notes previously issued by SLF were redeemed in full and terminated.

6. The weighted average cost of debt is calculated as (a) the actual amount incurred on debt obligations divided by (b) the daily average of total debt obligations.

7. The weighted average net investment spread is calculated as (a) the investment income yield less (b) the weighted average cost of debt.

Portfolio Highlights – Credit Quality

Credit Quality – Investment Portfolio

- Fundamental credit quality at September 30, 2017 remained strong with non-accrual investments as a percentage of total investments at cost and fair value of 0.6% and 0.2%, respectively.
- During the quarter ended September 30, 2017, there were no additional portfolio company investments classified as non-accrual.
- Over 85.0% of the investments in our portfolio continue to have an Internal Performance Rating¹ of 4 or higher as of September 30, 2017.

Quarterly Distributions

Annualized Return on Average Equity¹

GBDC Quarterly NAV per Common Share Since FY 2013 Q2

1. The net income annualized return on average equity is calculated as (a) the net increase in assets resulting from operations for the period presented divided by (b) the daily average of total net assets and does not represent a return to any investor in the Company.
2. As a supplement to GAAP financial measures, the Company has provided this non-GAAP financial measure. The Company believes that this non-GAAP financial measure is useful as it highlights the changes in NAV per common share for each quarter excluding the impact of a special distribution that was paid on December 29, 2016 and shows the pro forma change to the Company's NAV after payment of recurring distributions.

Portfolio Highlights – Senior Loan Fund LLC

- The annualized quarterly return for the quarter ended September 30, 2017 improved to 10.2% from 3.4% for the quarter ended June 30, 2017, as there was a small net gain on mark-to-market valuations during the quarter ended September 30, 2017, as compared to a net loss for the quarter ended June 30, 2017.
- Total investments at fair value for the quarter ended September 30, 2017 were \$300.9 million, a decrease of 6.6%, or \$21.3 million, from June 30, 2017. SLF purchased \$26.9 million of investments and unfunded commitments from GBDC at fair value which was offset by \$55.8 million of payoffs and sales.
- Subject to leverage and borrowing base restrictions, as of September 30, 2017, SLF had approximately \$102.3 million of remaining commitments and \$1.3 million of availability on its revolving credit facility.
