1. On September 16, 2019, Golub Capital BDC, Inc. ("we", "us", "our", the "Company" or "GBDC") completed the acquisition of Golub Capital Investment Corporation ("GCIC"). Purchase premium refers to the premium paid by GBDC to acquire GCIC in excess of the fair value of the assets acquired.

2. Due to the purchase accounting for the GCIC acquisition, as a supplement to U.S. generally accepted accounting principles ("GAAP") financial measures, the Company is providing additional non-GAAP measures. See the Endnotes at the end of this presentation for further description on the non-GAAP financial measures.

GBDC Performance Drivers

02

GBDC's Strong FQ1 2021 Earnings Were Driven by a Continuation of Themes from FQ4 2020

Key Themes from FQ1 2021

- GBDC portfolio companies generally continue to perform well, despite an economy that remained COVID-impacted
- Private equity sponsors generally have continued to step up to support their portfolio companies

Impact on GBDC

- Improved internal performance ratings¹
- Decline in non-accruals²
- Low net realized losses³
- Solid net unrealized gains, reversing a portion of FQ2 2020 unrealized losses³

1. Please see page titled, "Improved Borrower Performance and Increased Sponsor Support Continue to Drive Positive Trends in GBDC's Risk Ratings".

2. Please see page titled, "Portfolio Highlights – Credit Quality".

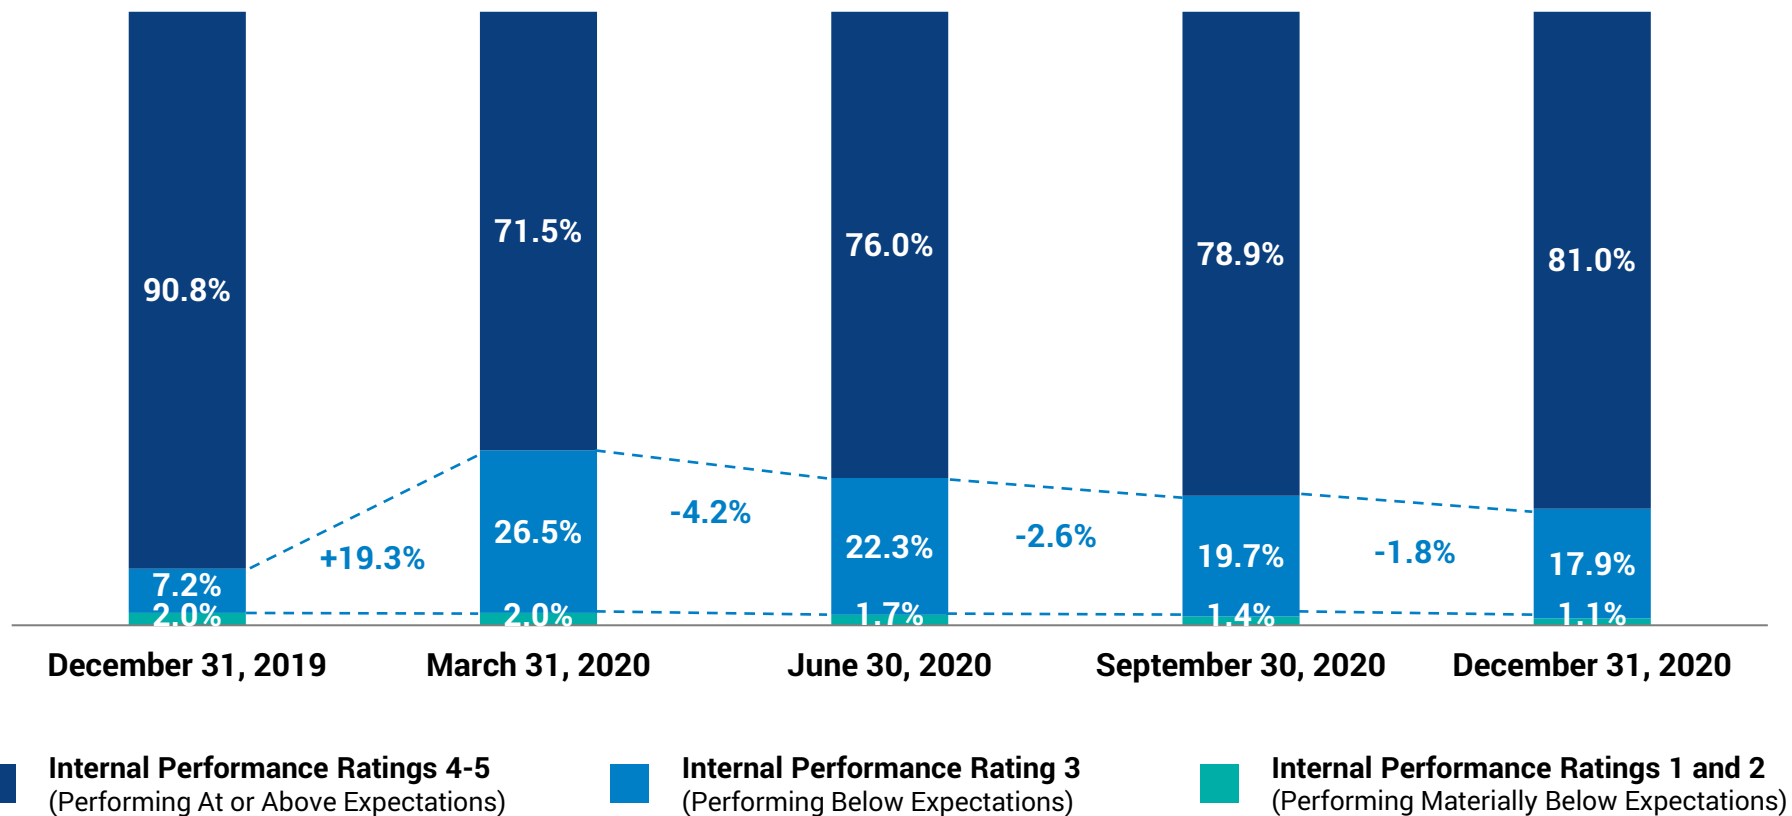

3. Please see page titled, "Low Net Realized Losses and Strong Unrealized Gains Drove a NAV Per Share Increase from September 30, 2020".

Improved Borrower Performance and Increased Sponsor Support Continue to Drive Positive Trends in GBDC's Risk Ratings

- Steady upward portfolio migration into internal performance ratings 4-5 since the quarter ended March 31, 2020 as borrowers continued to perform well
- Investments at fair value with internal performance ratings 1-2 continued to decline since the quarter ended March 31, 2020

1. Purchase premium refers to the premium paid by GBDC to acquire GCIC in excess of the fair value of the assets acquired.

2. Due to the purchase accounting for the GCIC acquisition and the retroactive adjustment to the weighted average share calculation to recognize the bonus element associated with the rights offering, as a supplement to U.S. generally accepted accounting principles ("GAAP") financial measures, the Company is providing additional non-GAAP measures. See the Endnotes at the end of this presentation for further description on the non-GAAP financial measures.

3. The weighted average shares of the Company's common stock outstanding used in computing basic and diluted earnings per share for periods ending on or before June 30, 2020 have been adjusted retroactively by a factor of approximately 1.03% to recognize the bonus element associated with rights to acquire shares of the Company's common stock that were issued to stockholders of record as of April 8, 2020.

4. Includes a special distribution of \$0.13 per share in Q1 2020.

Portfolio Highlights – New Originations

New Originations Data and Net Funds Growth

- Total investments at fair value increased by approximately 6.3%, or \$269.0 million, during the quarter ended December 31, 2020.
- As of December 31, 2020, we had \$43.5 million of undrawn revolver commitments to portfolio companies.

* Represents an amount less than 1.0%.

1. Net funds growth includes the impact of new investments and exits of investments as noted in the table above, as well as other variables such as net fundings on revolvers, net change in unamortized fees, net change in unrealized appreciation (depreciation), etc.

2. Junior debt is comprised of subordinated debt and second lien loans.

3. Weighted Average interest rate on new investments is based on the contractual interest rate at the time of funding. For variable rate loans that have a London Interbank Offered Rate "LIBOR" or Prime rate option, the contractual rate is calculated using current LIBOR at the time of funding, the spread over LIBOR and the impact of any LIBOR floor. For variable rate loans that only have a Prime rate option, the contractual rate is calculated using current Prime at the time of funding, the spread over Prime and the impact of any Prime floor. For fixed rate loans, the contract rate is the stated fixed rate.

1. Junior debt is comprised of subordinated debt and second lien loans.

2. The percentage of fixed rate loans and floating rate loans is calculated using total debt investments at fair value and excludes equity investments.

3. Based on S&P 2018 industry code. The ten largest industries represented as a percentage of the portfolio at fair value are labeled.

Portfolio Highlights – Economic Analysis

Economic Analysis

1. Investment income yield is calculated as (a) the actual amount earned on earning investments, including interest and fee income and amortization of capitalized fees and discounts, divided by (b) the daily average of total earning investments at fair value. Investment income yield excludes any amortization of purchase price premium as further described in the Endnotes at the end of the presentation.
2. Income yield is calculated as (a) the actual amount earned on earning investments, including interest and fee income but excluding amortization of capitalized fees and discounts, divided by (b) the daily average of total earning investments at fair value. Income yield excludes any amortization of purchase price premium as further described in the Endnotes at the end of the presentation.
3. The weighted average net investment spread is calculated as (a) the investment income yield less (b) the weighted average cost of debt.
4. The weighted average cost of debt is calculated as (a) the actual amount of expenses incurred on debt obligations divided by (b) the daily average of total debt obligations.

Portfolio Highlights – Credit Quality

Credit Quality – Investment Portfolio

- Non-accrual investments at December 31, 2020 as a percentage of total investments at cost and fair value declined to 1.6% and 1.2%, respectively, comparable to pre-COVID levels. 1. On September 13, 2011, the Company received exemptive relief from the SEC to permit the Company to exclude the debt of its small business investment company ("SBIC") subsidiaries from its asset coverage test. As such, asset coverage and regulatory leverage exclude the Small Business Administration ("SBA") debentures of the Company's SBICs.

2. Following stockholder approval of the application of the reduced asset coverage requirements available to business development companies to the Company, the minimum asset coverage ratio applicable to the Company decreased to 150% from 200% effective February 6, 2019.

Financial Performance Highlights

Quarterly Return on Equity and Quarterly Distributions (Last 5 Years)

* The quarterly return on equity is calculated as the annualized return on average equity divided by four. The annualized return on average equity for the periods ended through FQ3 2019 are calculated as (a) the net increase in net assets resulting from operations (i.e. net income) for the period presented divided by (b) the daily average of total net assets, then (c) compounded over one year. The annualized return on average equity for quarters FQ4 2019 and after is calculated as (a) adjusted net income, as defined in the Endnotes at the end of this presentation, divided by (b) the daily average of total net assets, then (c) compounded over one year. Adjusted net income is a non-GAAP measure and the Company believes this non-GAAP measure is useful as it excludes the non-cash expense/loss from the purchase premium as further described in the Endnotes at the end of this presentation. These returns do not represent an actual return to any investor in the Company.

Long History of Strong Shareholder Returns

Investors in GBDC's 2010 IPO have achieved a **9.8% IRR on NAV¹**

1. Internal rate of return ("IRR") on NAV is calculated using beginning of period NAV, distributions paid during the period, an incremental investment of \$2.29 per share, or the GBDC Rights Offering subscription price of \$9.17 per share divided by four (corresponding to the 1:4 issuance ratio in the GBDC Rights Offering, or the "GBDC Rights Offering Investment"), and ending period NAV, multiplied by 1.25x (corresponding to the 1:4 issuance ratio in the GBDC Rights Offering). Period beginning June 30, 2010 and ending December 31, 2020. GBDC made its initial public offering on April 15, 2010.

2. Calculated as (a) the sum of (i) NAV per share for the period presented plus (ii) cumulative regular and special distributions paid per share subsequent to the GBDC Rights Offering (b) divided by four to reflect additional shares purchased at the 1:4 issuance ratio in the GBDC Rights Offering.

Note: Amounts presented represent per share amounts for a hypothetical shareholder that purchased one share in GBDC's initial public offering ("IPO") on April 15, 2010 and subscribed for its pro rata rights through GBDC's rights offering, which closed on May 15, 2020 ("GBDC Rights Offering"). For illustrative purposes only; does not reflect the actual returns of a specific GBDC investor. Past performance does not guarantee future results. Sources: SEC filings and Golub Capital analysis.

Liquidity and Investment Capacity

* Information is presented as of December 31, 2020.

1. Interest rate for securitizations represents the weighted average spread over 3 month LIBOR for the various tranches of issued notes, excluding tranches retained by the Company. The weighted average interest rate for the GCIC 2018 Debt Securitization excludes a \$38.5 million note that has a fixed interest rate of 2.50%. For bank facilities, the interest rate represents the interest rate as stated in the applicable credit agreement. For SBA debentures, interest rates are fixed at various pooling dates and the interest rate presented represents the weighted average rate on all outstanding debentures for each licensee as of December 31, 2020.

2. On January 29, 2021, the reinvestment period was extended to May 3, 2021, the maturity date was extended to May 1, 2024 and the maximum commitment was reduced to \$250.0 million.

Goals For Navigating Through COVID

Key Goals

Update as of December 31, 2020

1.

Proactively manage GBDC's investment portfolio

GBDC's portfolio companies continued to perform well, and credit metrics have improved meaningfully

- Performance ratings have improved with over 80% of loans performing at or better than expectations at underwriting
- Non-accruals represent 1.2% of total debt investments at fair value, comparable to pre-COVID levels
- Realized losses remained low at approximately 50 bps of portfolio at cost¹ since COVID began
- 75% of unrealized losses from the March 2020 quarter have reversed

2.

Optimize the balance sheet

Increased liquidity and balance sheet flexibility

- Reduced secured funding mix to ~73%² and priced inaugural unsecured bond issuance at attractive pricing
- GAAP leverage of slightly less than 1:1 debt-to-equity
- Ample liquidity of over \$350³ million in cash and borrowing capacity

3.

Capitalize on attractive new investment opportunities

Record new originations in FQ1, leveraging the competitive advantages of the broader Golub Capital platform

1. Calculated as the sum of net realized losses on investments from FQ2 2020 – FQ1 2021 divided by the portfolio at cost as of 12/31/2019.

2. Includes Debt Securitizations, Morgan Stanley and Wells Fargo Credit Facilities. % of par outstanding as of 12/31/20.

3. Calculated as Unrestricted cash and foreign currencies, restricted cash and foreign currencies, and undrawn commitments as of 12/31/2020.

Appendix: Endnotes

A

Endnotes – Non-GAAP Financial Measures

1. On September 16, 2019, the Company completed its acquisition of GCIC. The merger was accounted for under the asset acquisition method of accounting in accordance with Accounting Standards Codification (“ASC”) 805-50, Business Combinations – Related Issues. Under asset acquisition accounting, where the consideration paid to GCIC’s stockholders exceeded the relative fair values of the assets acquired, the premium paid by GBDC was allocated to the cost of the GCIC assets acquired by GBDC pro-rata based on their relative fair value. Immediately following the acquisition of GCIC, GBDC recorded its assets at their respective fair values and, as a result, the purchase premium allocated to the cost basis of the GCIC assets acquired was immediately recognized as unrealized depreciation on the Company’s Consolidated Statement of Operations. The purchase premium allocated to investments in loan securities will amortize over the life of the loans through interest income with a corresponding reversal of the unrealized depreciation on the GCIC loans acquired through their ultimate disposition. The purchase premium allocated to investments in equity securities will not amortize over the life of the equity securities through interest income and, assuming no subsequent change to the fair value of the GCIC equity securities acquired and disposition of such equity securities at fair value, the Company will recognize a realized loss with a corresponding reversal of the unrealized depreciation upon disposition of the GCIC equity securities acquired.

On May 15, 2020, the Company completed a transferable rights offering, issuing 33,451,902 shares at a subscription price of \$9.17 per share. In accordance with ASC 260 – Earnings Per Share, it was determined the Company’s rights offering contained a bonus element as the exercise price at issuance was less than the fair market value of the stock. In accordance with ASC 260, basic and diluted EPS are required to be adjusted retroactively for the bonus element for all periods ending on or before June 30, 2020 by applying an adjustment factor to weighted average shares outstanding. The adjustment factor that was calculated in accordance with ASC 260 was 1.03%.

As a supplement to U.S. generally accepted accounting principles (“GAAP”) financial measures, the Company has provided the following non-GAAP financial measures:

- **“Adjusted Net Investment Income”** and **“Adjusted Net Investment Income Per Share”** - excludes the amortization of the purchase premium and the accrual for the capital gain incentive fee required under GAAP (including the portion of such accrual that is not payable under GBDC’s investment advisory agreement) from net investment income calculated in accordance with GAAP.
- **“Adjusted Net Realized and Unrealized Gain/(Loss)”** and **“Adjusted Net Realized and Unrealized Gain/(Loss) Per Share”** - excludes the unrealized loss resulting from the purchase premium write-down and the corresponding reversal of the unrealized loss resulting from the amortization of the premium on loans or from the sale of equity investments from the determination of realized and unrealized gain/(loss) in accordance with GAAP.
- **“Adjusted Net Income”** and **“Adjusted Earnings/(Loss) Per Share”** – calculates net income and earnings per share based on Adjusted Net Investment Income and Adjusted Net Realized and Unrealized Gain/(Loss). **“Adjusted Earnings/(Loss) Per Share”** also excludes the impact of the retroactive adjustment to the weighted average shares calculation due to the rights offering and the resulting impact on earnings per share.

The Company believes that excluding the financial impact of the purchase premium in the above non-GAAP financial measures is useful for investors as this is a non-cash expense/loss and is one method the Company uses to measure its financial condition and results of operations. In addition, the Company believes excluding the accrual of the capital gain incentive fee in the above non-GAAP financial measures is useful as a portion of such accrual is not contractually payable under the terms of either the Company’s current investment advisory agreement with GC Advisors, which was effective September 16, 2019, or its prior investment advisory agreement with GC Advisors, (each an, “Investment Advisory Agreement”). In accordance with GAAP, the Company is required to include aggregate unrealized appreciation on investments in the calculation and accrue a capital gain incentive fee on a quarterly basis as if such unrealized capital appreciation were realized, even though such unrealized capital appreciation is not permitted to be considered in calculating the fee actually payable under either Investment Advisory Agreement. As of each of December 31, 2020, September 30, 2020, June 30, 2020, March 31, 2020, and September 30, 2019, the cumulative capital gain incentive fee accrued by the Company in accordance with GAAP is \$0, and none was payable as a capital gain incentive fee pursuant to the current Investment Advisory Agreement as of December 31, 2019. Any payment due under the terms of the current Investment Advisory Agreement is based on the calculation at the end of each calendar year or upon termination of the Investment Advisory Agreement. The Company paid capital gain incentive fees in the amounts of \$1.2 million and \$1.6 million calculated in accordance with its prior Investment Advisory Agreement as of December 31, 2017 and 2018, respectively. The Company did not pay any capital gain incentive fee under the Investment Advisory Agreement for any period ended prior to December 31, 2017. Finally, the Company believes excluding the impact of the retroactive adjustment to the weighted average shares calculation due the rights offering and the resulting impact on per share data is useful for investors as it presents per share financial data that is consistent with what was previously reported.

Although these non-GAAP financial measures are intended to enhance investors’ understanding of the Company’s business and performance, these non-GAAP financial measures should not be considered an alternative to GAAP. Refer to slide ‘Summary of Quarterly Results’ for a reconciliation to the nearest GAAP measures.

2. Purchase premium refers to the premium paid by GBDC to acquire GCIC in excess of the fair value of the assets acquired.
